

Exploring Future Possibilities in Environmental Careers

Field Skills Workshop

Nov 30 | 4:00-4:45 PM
Hooker Auditorium

Field experiences on land or at sea provide a rich learning and immersive experience for future field scientists and is an important part of research and career advancement in environmental science research. In this workshop, lead by Angie Patterson, students will learn what to expect when venturing into field research including the skills that are necessary to have a productive, enriching, safe, and healthy field experience.
